Information security management as a key tool for digital threats.

The Problem - Cybercrime is the #1 threat to businesses worldwide

223 Milliarden €

damage to the German economy due to cyber crimes in 2021

112.340 €

additional cost for an average data breach due to remote work

11 Millionen

Data points can be accessed at any time by an average employee in Germany

Source: Bitkom, Varonis

**The solution:
Effective information security management**

Information Security Management System (ISMS)

- Identifies risks to crucial assets and provides measures to protect them
- Proposes action plans in case of threats
- Identifies and educates stakeholders

Information Security Certifications

The global gold standard for information security

Assessment and exchange mechanism for InfoSec in the automotive sector. Builds on ISO/IEC 27001.

NIS2 is making information security a must-have.

NIS2 is an EU directive for cyber security...

...that impacts up to 40.000 companies in Germany

Link: [Handelsblatt, 01/2023](#)

16.01.2023

EU directive NIS-2 enters into force

17.10.2024

Deadline for adoption into national law by the EU member states

The consequences:

NIS2 will **require** all European companies that meet the following criteria to build a robust cyber security capabilities. This is achieved primarily **through an ISMS**.

- 1 **>10 Mio. €**
Annual revenue
- 2 **>50**
Employees
- 3 Part of highly critical industries or other critical industries

How stakeholders benefit from an ISMS.

CEOs

- **Safeguard your company** from cyber attacks and ensure business continuity
- **Avoid regulatory fines** and hedge against personal liability
- **Gain trust and credibility** by demonstrating your commitment to protecting the data of your customers, suppliers, and partners

IT Leaders

- **Avoid data breaches** and secure your IT stack
- **Implement a future-proof security framework** to scale safely
- **Build better products and solutions** that focus on data protection and security

Sales Leaders

- **Qualify for enterprise tendering*** processes
- **Proof potential clients** that their data will be safe with you
- **Find new clients** and expand your network (TISAX)

Compliance Officers

- **Implement a majority of relevant compliance processes** in a single project
- Benefit from a **comprehensive system** with checks and balances
- Achieve a **well-educated organization** through mandatory trainings

***Virtually all enterprise clients require an ISO 27001 certification from potential suppliers (or TISAX in automotive sector).**

Ready to build your ISMS? SECJUR gets you there, comfortably.
